STAND4EU – EFFRA MANUFACTURING DAYS 2024

STAND4EU recently participated in the EFFRA Manufacturing Days, where we highlighted the vital role of standards in advancing innovation and growth in manufacturing. We invite professionals at all levels to engage with STAND4EU through our specialized training and coaching sessions.

WORKSHOP INTO THE STANDARDISATION PROCESS

The STAND4EU Project recently hosted a workshop focused on the standardisation process at the AM-Platform meeting, held on May 15th in Erfurt, Germany, during the esteemed Rapid.Tech 3D event. Celebrating its 20th edition, Rapid.Tech 3D, a premier event in additive manufacturing, took place from May 14th to 16th, 2024. The workshop provided valuable insights into advancements and the standardisation process within the AM industry.

STAND4EU | PULSATE 2024: LASER INNOVATIONS SUMMIT

Stand4EU was part of the PULSATE 2024: Laser Innovations Summit!

This two-day summit brought together industry leaders, innovative thinkers, and pioneering researchers to explore how laser technology is revolutionizing manufacturing across various sectors.

STAND4EU | FIRST COACHING SESSION FOR AI AND GREEN ENERGY PROJECTS

On July 9th, we co-hosted a workshop on green energy and AI standardization. Neovate, HSbooster.eu, and GREEN.DAT.AI shared insights on the importance of ISO 50001 for energy management, the role of collaboration in standardization, and the need for trustworthy Green AI in mobility data analytics.
